

Ref. No. MOEW/AHD/5075/2015
Date 23/11/2015

To Whom it may Concern

Following the request of the Central Veterinary Research Laboratory (CVRL), Dubai, to the Ministry of Environment and Water (MOEW) and based on the report of the OIE Reference Laboratory for Rabies (ANSES, France) dated in April 2015, indicating the successful results of the undertaken proficiency tests between the two laboratories, using Fluorescent Antibody Virus Neutralization (FAVN) Test for Rabies, a test used to measure the response of animal's immune system to rabies vaccine, and taking into consideration these results, the MOEW recognises CVRL as an approved laboratory to perform serological tests to monitor the effectiveness of rabies vaccines in dogs and cats.

**For the Director of Animal Health and Development department
